Can-Am Defender Front Bumper Installation

1) Remove Battle Armor Front Bumper and hardware from box. Hardware supplied is shown below.

Contains the following: (2)- 5/16'' x 1" carriage bolts, (2) 5/16'' flat washers, and (2) 5/16''- 18 Nylon insert locknut.

2) Loosen the two torx head bolts located on front of Defender. Slide the open ended mounting bumper tabs over the torques head bolts and let bumper hang.

3) Using the supplied hardware bolt the lower bumper tabs to deflector plate. Tighten all hardware.

4) Note if installing light bar. Mount light bar to bumper before installing bumper.
